Tuesday and Wednesday will be difficult because we are hosting a trilateral meeting with Canada, Mexico, and stakeholders. Maybe Thursday before 9:30am?

Aldicarb Team – Jeremy Witte of House Ag was not able to be on the call on Fri (citrus and antibiotics) and asks for a call regarding AgLogic's application to add the use of aldicarb on oranges and grapefruit to the label, with a PRIA due date of June 2020. Availability for a call during the week of Sept 3? Thanks,
Sven

Thanks for this, Sven.

I've also reached out to the registrant with questions. I understand there is a desire to push that PRIA date up so that a decision could be made in time for growers to plan for the 2020 growing

season. Understand that it still has to go through the process and evaluation, but I know it would benefit the growers to have an answer sooner, whether it's a registration approval or denial so that folks can look for other options. What would it take to move the PRIA date up to the end of this year?
